

## Description

Synthetic hydraulic oil for motorcycle forks and shock absorbers. It has exceptional shearing resistance and is suitable for sports and urban use. It has excellent antioxidant, anticorrosion and antiwear properties. It releases the air bubbles produced in shock absorber systems by maintaining homogeneous and smooth behaviour at all times within a wide range of temperatures.

## Properties

- Good performance when faced with changes in temperature due to its high viscosity index.
- Good shock absorbing characteristics and compatibility with oil seals.
- Excellent anti-friction performance thanks to its special additives.
- Great resistance to ageing and good anti-rusting and anticorrosive properties.

## Quality levels, approvals and recommendations

- DIN 51524 Part 3 HVLP
